Haya Mohammed

# Dose The Healthcare sector have more or similar revenues to the Financial sector in Year 4

### Total Revenue For Financial Sector in Year 4

### Total Revenue For Health Care Sector in Year 4

Here are histograms for Total revenues for HealthCare and Financial sector companies reported in Year 4.

- The mean for HealthCare is about \$27 billion. For financials above \$20 billion, However, the median for health care is \$10 billion, which is so close to the financial median of \$10 billion. The standard deviation for health care (54 billion) is double the standard deviation for financial services (\$25 billion).
- the healthcare sector exhibits a broader range, with a minimum of 1.03 billion and a maximum of 190.88 billion, totaling 189.85 billion. On the other hand, the financial sector's total revenue range is narrower, ranging from 1.4 billion to 93.06 billion, summing up to 91.65 billion. This suggests a higher variability in earnings within the healthcare industry compared to the financial sector.

That means, HealthCare sector has more revenue than the Financial sector in year 4.
